

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

#### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

## INTRODUCTION.

This Catalogue of the Illinois State Library is the first printed since 1880, and will, I think, be found fairly accurate. The work of preparing the copy for the printer has occupied nearly a year, and the greatest care has been taken to avoid errors.

The library contains thirty thousand volumes, besides ten or twelve thousand duplicates of State and national publications.

The arrangement of this catalogue is that in general use—the dictionary system. Each book is entered under its author, title and subject, and the whole arranged in one alphabetical series. The exceptions to this system are all anonymous books and those having arbitrary titles which do not admit of being placed under subjects.

Pseudonymous works are entered under the author's name, when known, with a cross reference from the pseudonym; and under the pseudonym when the real name has not been ascertained

Books should be looked for under the first word of the title, under the author's name, or under the subject.

State documents will be found under the heading of the State. U. S. publications will be headed as such.

No books are entered under names of translators.

A few entries have been made of important articles from books which appear under other titles. This has necessitated a few abbreviations, to which the following list furnishes a key:

Pacific R. R. R	.Pacific Railroad Route Reports.
Pam	.Pamphlet.
Paris Expos. Rep	.Paris Exposition Report.
Smith. Cont	.Smithsonian Contributions to Knowledge.
Smith. M. C	.Smithsonian Miscellaneous Collections.
Smith. R	.Smithsonian Report.
Sparks	.Sparks' Library of American Biography.
U. S. Explor. Exped	.U. S. Exploring Expedition, under Wilkes.
Vienna Expos. Rep	Vienna Exposition Report.

Further abbreviations found in the lists refer to sets or series of books which have an individual title under which they are

catalogued, and such references will enable the Librarian and assistants to find the books more readily. They are:

Am. Rel. Leaders	American Religious Leaders.
Con. Sci. Ser	Contemporary Science Series.
E. M. L	English Men of Letters.
Gt. Writers Ser	Great Writers Series.
Inter. Ed. Ser	International Educational Series.
Inter. Sci. Ser	
Ser. R. I	Rhode Island Historical Series.
